## ***BIOGRAPHY (long):***

We are Bad Rain—from everywhere, for everyone! This international band, composed of musicians from diverse backgrounds, blends their collective experience and passion to create a sound that resonates far and wide. Drummer Veit and bassist Chris, both veterans of the hard rock band Password Monkey, anchor the band with a grooving and driving rhythm section honed over a decade in the Munich rock scene. Guitarists Adnan Basic and Daniel Davis bring intensity and melody, with Daniel, known for his work with 7Mazes, adding layers of intensity and melody. Now, with the addition of Croatian vocalist Zoran Mišić, Bad Rain is a band that's both seasoned and invigorated, ready to take on stages and playlists alike.

Bad Rain's sound is a testament to their years of dedication and hard work, which is evident in their tours, studio recordings, and live shows. This commitment is showcased in their debut EP, *Afterlife*, a collection of tracks that encapsulate their musical journey. Their sound, driven by solid riffs and captivating rhythms, seamlessly blends the raw power of blues rock with the intensity of modern rock. With Mišić's confident and heartfelt vocals now part of their live performances, Bad Rain's music takes on a new life, promising to make a lasting impact on listeners worldwide. Their music is not just another addition to the noise—it's a powerful testament to the enduring spirit of Rock 'n' Roll.

# REVIEWS – Debut EP „Room to Breathe“

„The hard rock combo leaves no room for unnecessary sound frills on their five-track EP. The single Afterlife rolls through the speakers with full distortion and carried by the soulful rock voice of singer Dan Byrne. The mid-tempo bangers „Your Chains“ and the lively „Twisted Love“ are stylistically reminiscent of Little Caesar and Thunder.“ 4.5 of 5 Stars! – [GUITAR MAGAZIN](#)

“Drummer Veit Schlembach, guitarist Dani Davis and bassist Chris Buchberger – deliver five tracks of breath-taking blues-rock filth ‘n’ fury that broils, bubbles and seethes with passion and pathos, mixed with ironic laconicism and languidity but enough fiery volcanism to keep Mount Etna in business for the next millennium. This is an EP that doesn’t need room to breathe. It immediately invades every one of your senses, plants itself on your worn-out leather sofa, demands a beer and declares “inhale me”. Well, I don’t smoke, but I’ll gladly have some of these fumes and take a walk in this bad rain...” –

“When great musicians from Germany unite with an amazing English singer, you have the perfect combo to blast the music scene. High-pitch vocals, melodies and kick-ass riffs. This brings back memories of the early seventies with the bands that made the epic music we all know and worship. So yeah I took a while to do this review, once again this is perfect. *Bad Rain* is going to blast the world with their straight-to-the-point awesome songs. Some of the musicians are already known from previous bands, but they created the best of the best bands we need. A must-have 100/100.” –

"Your Chains" contains various special features. While the beginning sounds like a bluesy story, the ballad turns into a melancholy song worth listening to. An explosive mixture with Dan's voice and background vocals. "Open up your heart and set me free" could also mean: "open your ears and let the sound creep in". – [HELLFIRE MAGAZINE](#)

“Bad Rain are a newer band, made up of international musicians, evidently with significant previous experience. And this is clear as soon as you hear the first notes of their EP release, called “Room To Breathe”, which contains 5 songs. The line-up features an excellent singer named Dan Byrne, and the group initially made their mark on a wider audience with the single and video for the song “Afterlife”. Their EP is produced in a modern way, and the stylistic and performing composition combines elements of melodic hard rock and classic rock. The influences of 80’s hard rock and the British school are also very noticeable” – [TIME MACHINE MUSIC](#)
