Should there be any questions or problems with microphones or channels, just get in touch with us and we will solve it quickly together. THANK YOU!

Dear Mixing Engineer,

thank you very much for taking care of our sound. We know how important you are for our show and the sound and have some little information for you that might can help.

Our music is characterized above all by multi-voiced guitar sounds. It would be great if you could make sure that the two guitars are balanced in terms of volume and panning.

Both guitars play both leads and rhythm - differently from song to song (why 100% panning should be avoided). These are both equally important to the sound.

Apart from that, there are also a few solo and interaction parts that we give them in the form of a small set list before the show.

Thank you and see you at the show.

Best regards - Bad Rain
